

```
#include <stdio.h>
void main()
{
    int n, reversed = 0;
    printf("Enter a no:");
    scanf("%d",&n);
    while (n!=0)
    {
        reversed = reversed*10+(n%10);
        n=n/10;
    }
    printf("Reversed no : %d",reversed);
}
```
